

Beauty That Stands the Test of Time

Now that your *Clarvista®* shower glass is installed in your home, follow these cleaning guidelines to maintain its stain-resistant coating and keep it looking beautiful for years to come:

- Non-abrasive, off-the-shelf cleaners can be used on *Clarvista®* glass without diminishing or damaging *Clarvista®* glass's protection
- Thoroughly rinse all cleaning solutions and other debris off the glass.
- Rinse all cleaning solutions from shower heads, faucets, door handles, frames, guides, hinges, fasteners and any rubber or plastic sealants, then dry with a soft cloth.
- Wipe away splashed materials—such as dirt or oil—before they dry on the glass surface.
- Never use scrapers or razor blades to remove stubborn deposits or labels.

For best results:

Simply squeegee the glass while it's still wet after each use to restore its brilliance and make regular cleaning quick and easy.

*In areas with hard water, more frequent squeegeeing and cleaning may be needed to maintain clarity and prevent mineral spotting. Regular care helps keep *Clarvista®* glass looking its best.
